A. General informations

All Easy Lite products known as Polystone Fiber are 100% hand crafted and meet the highest demands in quality. They are made of Fiber Reinforced Polyester Composites (FRP) ultra light, but strong. Handmade manufacturing process may result in little color deviations and tiny, natural hairline cracks even on certain well-qualified products

Item structure is designed to ensure easy handling and solid, high-end quality with very strong durability on each side and corner of products

Durable top testing with full of soil and water, hanging with hooks

Durable body testing with full soil and water inside for testing strength ability of bottom, walls and corners

Particular reinforcement for very strong walls

Special designed bottom for good drainage

Each production step is followed by on site control.

At the end of process, all products must go through strenuous, strict and final quality control to catch company's standard.

Very high packaging is a standard for good container handling and safe transit as well.

B. Instruction for durable EasyLite products

1. Storing instructions

a. For unused planters

It is ideally to store the planter in protected, covered, frost-free location away from the elements.

In the case of storing outside, it needs to be sure that no water from rain, snow, frost ...) stagnate / condense on the surface and inside planters to avoid discolor or damage. Please follow below instructions:

a1. Remove nylon bag, shrink-wrap or cardboard.

a2. Use pot feet to raise the planter from the ground.

a3. Do not stack into each other. In the case of nesting, it needs to raise inside planter to avoid being miscoloured.

a1

a2

a3

b. For planters winter season:

Whether the planters are to remain planted or not, ideally they should be stored indoors or in the garage/covered storage during wintertime.

If a planter must be left outside unplanted over the winter, it should then be covered or wrapped with burlap or any absorbent material (old blanket/towel) and then wrapped with dark plastic. This will prevent moisture from accumulating in the planter causing it to crack or break .

2. Planting Instructions

To ensure proper drainage, avoid stagnation inside and outside of planters.

To sustainably prevent water logging, a drainage system needs to be prepared:

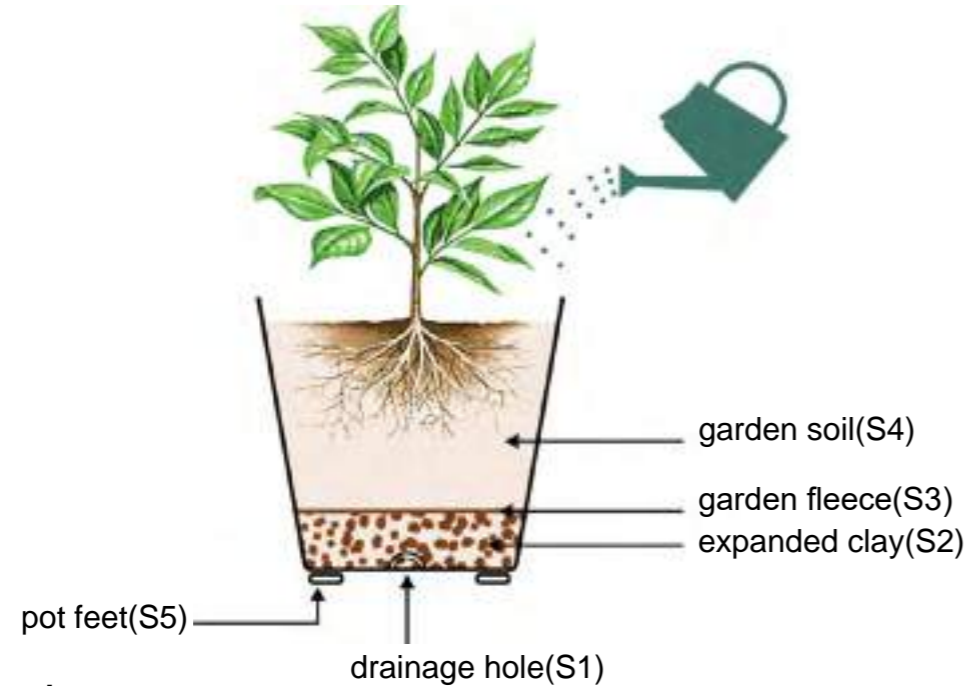

S1. Cover the hole and the bottom of the planter with a filter fleece. This will prevent soil and other materials to congest the hole

S2. Fill in hydroton / expanded clay pellets with a height of 2-5 cm.

S3. Cover the hydroton with another layer of filter fleece.

S4. Fill in the soil.

S5. Put the planter on pot-feet to allow the water to run off easily.

3. Care instructions

Color and Material: EasyLite planters are easy to clean with water and sponge or soft brush. Please do not use any chemicals and steam cleaner or high pressure cleaner to avoid damage to the planters.

Shape: Putting items on an EVEN surface to prevent them from compromising and deforming.

Drainage: Please ensure drainage by using expanded clay or gravel at the bottom and placing the planters on pot feet (no saucers in winter time).

Pot size: Different types of plants will have varying preferences so please make sure to understand your plant root type, its growth rate and size in order to choose the right pot size.

Sizing up: Please remember to size up planters after a certain time to assure the development of roots will not destroy the planters.

Warranty: 5 year frost-proof-guarantee. However, We will not be responsible for any damage due to improper use.

D. Fountain

1. Assembly Instruction & Usage Instruction

Component List

(Please check the components before starting to assembly)

1. Rubber ring
2. Led
3. Pump
4. 2-way-splitter
5. Rubber stopper
6. Plastic tube
7. Plug

S1 Place the LED into the hole of the lid. Rubber ring may help to secure the LED.

S2 Put the wire of led and pump through the pipe.

S3 Attach the wire of pump and led to 2-way splitter.

S4 Pull the wire back to the pipe or hide it under the bottom.

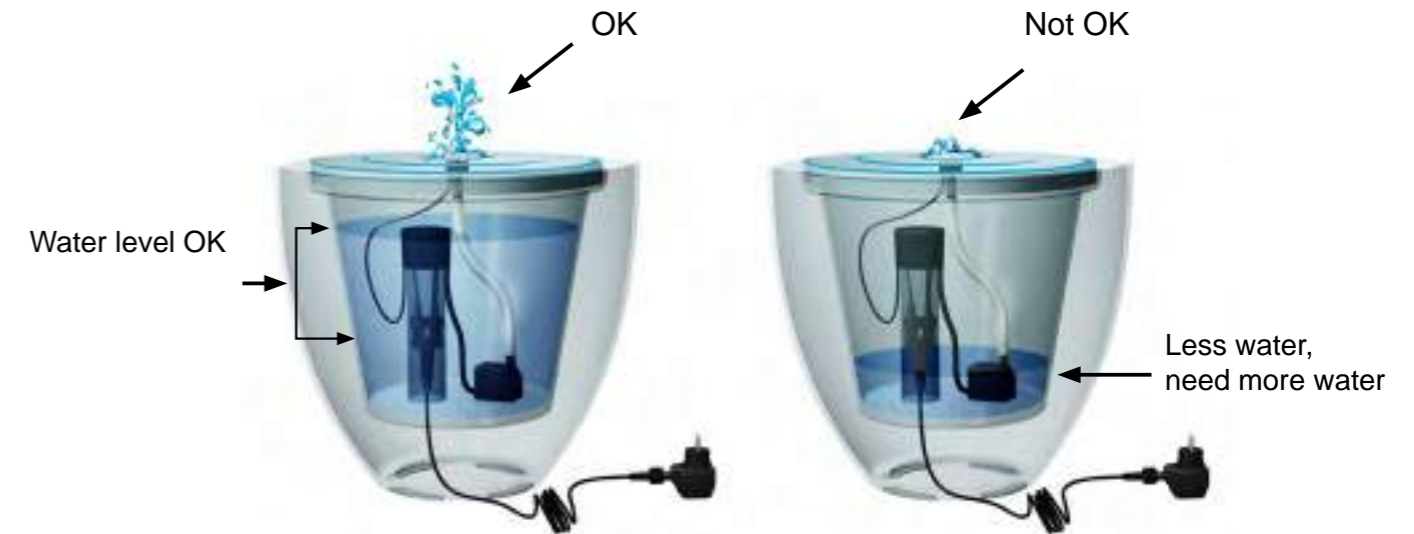

S5 Cover the pipe with the rubber stopper after pull the wire to the pipe.

S6 Attach the plastic tube to the led and pump.

S7 Pour the water in. Attach the wire to the plug. Press the pump down and place the lid of fountain.

2. Fountain maintenance

S1. Consistent filling water is required to maintain a proper water level and ensure that the pump remains totally submerged. If not, the pump will be damaged.

S2. Keep pump inflow free of debris to insure proper water flow.

S3. Periodical cleaning of the fountain will extend its life.

S4. Do not use the fountain in wintertime. We suggest that fountain not be left outside in wintertime. If fountain must be left outside, remove all technical equipment (pump, rubberstopper and drainage pipe). Please make sure that water does not accumulate in the basin and freeze.

S5. If it is used outdoors, it should be equipped with a protective cover for plug.

WARNING:

Place the power plug in the dry place protected from direct sunlight where the temperature does not high.

Eschbach Tan Dinh Ltd. is proud to celebrate its 31th year in business. Our company is located in the Tan Dinh region to the north of Ho Chi Minh City, formerly Saigon. Eschbach Tan Dinh Ltd. has grown to become world-wide market leader in production, in design and material development. Pottery, fountains, furniture and high quality decorative products complete our product portfolio.

If you have questions regarding our product line or our company's operations. We would be pleased to answer any questions and provide you with further information at any time.
